

Don't just **build** it...

Protect it!

GRACE

Weather **Protection** Systems

Recently, there is nothing predictable about the weather. Therefore, “building as usual” is not an option. Every home must be constructed to withstand wind driven rain, snow and ice, and everything else that Mother Nature brings. Grace’s residential *Weather Protection Systems* have been designed and proven to guard any house from the harshest weather conditions and to improve energy efficiency. From the foundation to the roof, Grace has you protected. Build with *Grace Weather Protection Systems*, so no matter what the weather condition is, your home, business and family are protected.

Don’t just build it. **Protect it...with Grace.**

Build with Grace – The leader in waterproofing for more than 50 years

Grace invented self-adhered waterproofing membranes and has remained the industry leader through continuous innovation. Our products are used on numerous signature buildings around the world. Building professionals and homeowners rely on Grace's products to protect their most valuable assets.

Prevent moisture damage and improve energy efficiency

Leaky roofs, windows, doors and basements are frequent occurrences and cost a lot of money in remediation and repair. The damage can cause mold growth and poor indoor air quality. The first step in solving these issues is to properly control moisture. Grace's residential *Weather Protection Systems* help manage moisture and thus ensure the home is built to last. By "sealing" the house with Grace's complete *Weather Protection Systems* the homeowners can reduce their energy bills.

From the foundation to the walls and roof, *Grace Weather Protection Systems* have you covered.

Don't just **build** it...
Protect it!

Roof:

Ice & Water Shield® Self-Adhered Underlayment

- Waterproofs the roof deck
- Provides superior leak protection

Tri-Flex® Synthetic Underlayment

- Sheds water
- 10 times stronger and more durable than felt

Walls:

Vycor enV® (liquid) Vycor enV®-S (sheet) Fully-Adhered Weather-Resistive Barriers

- Protect against mold, rot and poor indoor air quality caused by water intrusion
- Improve the energy efficiency of the home

Vycor® Self-Adhered Flashings

- Protect against water leaks through vulnerable areas, such as windows and doors

Basement:

Bituthene® Below-Grade Waterproofing

- Keeps basement dry
- Prevents leaks due to cracks in basement walls

Florprufe® Fully-Adhered Vapor Barrier

- Protects basements and floors from water vapor in the ground

Exterior Deck:

Vycor® Deck Protector

- Protects deck joists from moisture damage
- Extends life of deck

Don't just **build** it...
