2 Hazard(s) identification

Classification of the substance or mixture

Flammable liquid and vapor.

May cause allergy or asthma symptoms or breathing difficulties if inhaled.

May cause an allergic skin reaction.

May cause respiratory irritation.

May be fatal if swallowed and enters airways.

Label elements: The product is classified and labeled according to the Globally Harmonized System (GHS)

Hazard pictograms

Danger

Hazard statements

Flammable liquid and vapor. May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause an allergic skin reaction. May cause respiratory irritation. May be fatal if swallowed and enters airways. **Precautionary statements** Avoid breathing dust/fume/gas/mist/vapors/spray

Reviewed on 03/21/2017

Trade name: Silcor Top Coat 70 - Part A

Wear protective gloves/protective clothing/eye protection/face protection. Keep away from heat/sparks/open flames/hot surfaces. No smoking. [In case of inadequate ventilation] wear respiratory protection. Take precautionary measures against static discharge. IF SWALLOWED: Immediately call a POISON CENTER/ doctor. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If skin irritation or rash occurs: Get medical advice/attention.	(Cont. from page 1)

HEALTH3FIRE2Flammability = 2REACTIVITY 1Reactivity = 1	
Other hazards	
Results of PBT and vPvB assessment	
PBT: Not applicable. vPvB: Not applicable.	

3 Composition/information on ingredients

Chemical characterization: Mixture

Description: Mixture of the hazardous substance(s) listed below with additional nonhazardous ingredients.

	Hazardous components:		
53880-05-0	3-Isocyanatomethyl-3,5,5-trimethylcyclohexyl isocyanate, oligomers	50-100%	
64742-95-6	Solvent naphtha (petroleum), light aromatic	10-20%	
110-43-0	heptan-2-one	10-20%	
4098-71-9	4098-71-93-isocyanatomethyl-3,5,5-trimethylcyclohexyl isocyanate0.1-1.0%		
Additional	Additional information: Non-hazardous ingredients may be listed in Section 15; Right-To-Know disclosure.		

4 First-aid measures

Description of first aid measures

General information: Get medical advice/attention if you feel unwell.

After skin contact:

Immediately wash contaminated skin with soap or mild detergent and water. If this chemical soaks clothing, immediately remove clothing and wash skin.

After eye contact: Rinse cautiously with water for several minutes.

After swallowing:

Rinse mouth.

Do NOT induce vomiting.

Information for doctor:

Most important symptoms and effects, both acute and delayed Allergic reactions

Reviewed on 03/21/2017

Trade name: Silcor Top Coat 70 - Part A

Harmful: may cause lung damage if swallowed.

(Cont. from page 2)

Indication of any immediate medical attention and special treatment needed No further relevant information available.

5 Fire-fighting measures

Extinguishing media

Suitable extinguishing agents: CO2, extinguishing powder or water spray. Fight larger fire with alcohol resistant foam. **For safety reasons unsuitable extinguishing agents:** Water with full jet

Special hazards arising from the substance or mixture No further relevant information available.

Additional information Collect contaminated fire fighting water separately. It must not enter the sewage system.

6 Accidental release measures

Personal precautions, protective equipment and emergency procedures

Wear protective equipment. Keep unprotected persons away.

Environmental precautions: Prevent seepage into sewage system, workpits and cellars.

Methods and material for containment and cleaning up:

Dispose contaminated material as waste according to section 13 of the SDS.

Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

7 Handling and storage

Handling:

Precautions for safe handling

Flammable mixtures with air can be formed in emptied containers. Do not puncture, cut, drill, heat or weld uncleaned drums. **Information about protection against explosions and fires:**

Keep ignition sources away - Do not smoke.

Protect against electrostatic charges.

Use explosion-proof apparatus / fittings and spark-proof tools.

Empty containers may retain hazardous residue, both liquid and vapor.

Ensure good interior ventilation, especially at floor level. (Fumes are heavier than air).

Conditions for safe storage, including any incompatibilities

Storage:

Further information about storage conditions: Keep receptacle tightly sealed.

(Cont. from page 3)

Trade name: Silcor Top Coat 70 - Part A

Specific end use(s) No further relevant information available.

8 Exposure controls/personal protection

Additional information about design of technical systems: No further data; see item 7.

Control parameters

Components with limit values that require monitoring at the workplace:

110-43-0 heptan-2-one

PEL (USA) Long-term value: 465 mg/m³, 100 ppm

REL (USA) Long-term value: 465 mg/m³, 100 ppm

TLV (USA) Long-term value: 233 mg/m³, 50 ppm

4098-71-9 3-isocyanatomethyl-3,5,5-trimethylcyclohexyl isocyanate

REL (USA) Short-term value: 0.18 mg/m³, 0.02 ppm Long-term value: 0.045 mg/m³, 0.005 ppm Skin

TLV (USA) Long-term value: 0.045 mg/m³, 0.005 ppm

Additional information: The lists that were valid during the creation were used as basis.

Exposure controls

Personal protective equipment:

General protective and hygienic measures: The usual precautionary measures for handling chemicals should be followed.

Breathing equipment:

Control exposure to ingredients with workplace control parameters if mentioned above. If no ingredients are listed, respiratory protection is generally not required.

If exposure limits are listed and may be exceeded, use approved respiratory protective equipment and filter type appropriate for the listed ingredients. (NIOSH, CEN, etc.).

Due to the presence of isocyanate, supplied air respirators must be worn whenever the product is applied in poorly ventilated areas unless local exhaust will maintain exposures below acceptable limits. A chemical cartridge respirator with organic vapor cartridge is required when local exhaust is unavailable or inadequate to control exposures below required limits. When supplied-air respirators are not available or use is not practical, an air-purifying respirator may be an acceptable alternative if the recommendations below are followed:

Use of fans to improve air circulation and general ventilation or exhaust ventilation to remove isocyanate vapors when working in confined spaces.

The use of an air-purifying respirator fitted with organic vapor cartridge and a well managed cartridge change schedule. Due to the low exposure limits and poor odor warning properties, cartridges should be replaced on a daily basis at a minimum. To complement the above, a viable isocyanate measurement system should be used to monitor workplace levels.

Protection of hands: Gloves should be worn to prevent skin contact and should be impermeable and resistant to the product.

Eye protection:

Safety glasses with side shield protection.

Body protection:

Use personal protective equipment as required.

Take off contaminated clothing.

12 Ecological information

Toxicity

Aquatic toxicity: No further relevant information available.

Persistence and degradability No further relevant information available.

Behavior in environmental systems:

Bioaccumulative potential Accumulation in organisms is not to be expected.

Mobility in soil Absorption into solid soil phase is expected.

Additional ecological information:

General notes: Not known to be hazardous to water.

Results of PBT and vPvB assessment

PBT: Not applicable. **vPvB:** Not applicable.

Other adverse effects

Do not allow to enter soil, waterways or waste water channels. Inhibition of degradation activity in activated sludge is not to be anticipated during introduction at low concentrations.

13 Disposal considerations

Disposal methods Do not dump into any sewers, on the ground or any body of water.

Disposal methods:

Consult all regulations (federal, state, provincial, local) or a qualified waste disposal firm when characterizing product for disposal. Dispose of waste in accordance with all applicable regulations.

Recommendation:

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

Uncleaned packagings:

Recommendation: Dispose of contents/container in accordance with local/regional/national/international regulations.

3 Composition/information on ingredients

Chemical characterization: Mixture

Description: Mixture of the hazardous substance(s) listed below with additional nonhazardous ingredients.

Hazardous components:

108-65-6 2-Propanol, 1-methoxy-, acetate

112926-00-8 Silica, amorphous, precipitated and gel

8052-41-3 Stoddard solvent

Poly(oxy-1,2-ethanediyl), alpha-tridecyl-omega-hydroxy, phosphate

Additional information: Non-hazardous ingredients may be listed in Section 15; Right-To-Know disclosure.

4 First-aid measures

Description of first aid measures

General information: Get medical advice/attention if you feel unwell.

After inhalation:

If symptoms develop, supply fresh air. If required, provide artificial respiration and seek immediate medical treatment.

After skin contact:

Immediately wash contaminated skin with soap or mild detergent and water. If this chemical soaks clothing, immediately remove clothing and wash skin.

After eye contact: Rinse cautiously with water for several minutes.

After swallowing:

Rinse mouth.

Do NOT induce vomiting.

Indication of any immediate medical attention and special treatment needed No further relevant information available.

5 Fire-fighting measures

Extinguishing media

Suitable extinguishing agents: CO2, extinguishing powder or water spray. Fight larger fire with alcohol resistant foam. **For safety reasons unsuitable extinguishing agents:** Water with full jet

Special hazards arising from the substance or mixture No further relevant information available.

Additional information Collect contaminated fire fighting water separately. It must not enter the sewage system.

6 Accidental release measures

Personal precautions, protective equipment and emergency procedures

Wear protective equipment. Keep unprotected persons away.

Environmental precautions: Prevent seepage into sewage system, workpits and cellars.

Methods and material for containment and cleaning up:

Contain and/or absorb spill with inert material (i.e. sand, vermiculite) then place in a suitable container.

Dispose contaminated material as waste according to section 13 of the SDS.

Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

7 Handling and storage

Handling:

Precautions for safe handling

Flammable mixtures with air can be formed in emptied containers. Do not puncture, cut, drill, heat or weld uncleaned drums. Avoid contact with eyes, skin and clothing. Do not take internally.

Practice good personal hygiene to avoid ingestion. Use only with adequate ventilation. Wash clothing before reuse. FOR PROFESSIONAL USE ONLY. KEEP OUT OF CHILDREN'S REACH.

Information about protection against explosions and fires:

Keep ignition sources away - Do not smoke.

Protect against electrostatic charges.

Use explosion-proof apparatus / fittings and spark-proof tools.

Empty containers may retain hazardous residue, both liquid and vapor.

(Cont. on page 4) USGHS Printing date 06/07/2018

Version Number 1.0

Trade name: Silcor Top Coat 70 - Part B

Ensure good interior ventilation, especially at floor level. (Fumes are heavier than air).

Conditions for safe storage, including any incompatibilities

Storage:

Further information about storage conditions: Keep receptacle tightly sealed.

Specific end use(s) No further relevant information available.

8 Exposure controls/personal protection

Additional information about design of technical systems: No further data; see item 7.

Control	parameters
CONTINU	parameters

Components	Components with limit values that require monitoring at the workplace:	
108-65-6 2-Pi	ropanol, 1-methoxy-, acetate	
WEEL (USA)	Long-term value: 50 ppm	
112926-00-8	Silica, amorphous, precipitated and gel	
PEL (USA)	20mppcf or 80mg/m3 /% SiO2	
REL (USA)	Long-term value: 6 mg/m ³ See Pocket Guide App. C	
TLV (USA)	TLV withdrawn	
8052-41-3 Sto	oddard solvent	
PEL (USA)	Long-term value: 2900 mg/m ³ , 500 ppm	
REL (USA)	Long-term value: 350 mg/m ³ Ceiling limit value: 1800* mg/m ³ *15-min	
TLV (USA)	Long-term value: 525 mg/m ³ , 100 ppm	

Additional information: The lists that were valid during the creation were used as basis.

Exposure controls

Personal protective equipment:

General protective and hygienic measures:

The usual precautionary measures for handling chemicals should be followed.

Store protective clothing separately.

Breathing equipment:

Control exposure to ingredients with workplace control parameters if mentioned above. If no ingredients are listed, respiratory protection is generally not required.

If exposure limits are listed and may be exceeded, use approved respiratory protective equipment and filter type appropriate for the listed ingredients. (NIOSH, CEN, etc.).

Isocyanates (contained in Part A and in mixed components) are known as respiratory sensitizers. Consult additional respiratory protection measures for Part A.

Protection of hands: Rubber or other impervious gloves should be worn to prevent skin contact.

Eye protection:

Safety glasses with side shield protection.

A face shield should also be worn if there is potential exposure to splash or spray.

Body protection:

Use personal protective equipment as required.

Take off contaminated clothing.

9 Physical and chemical properties

Information on basic physical and chemical properties		
General Information Appearance: Form: Color: Odor: Odor threshold:	Medium viscosity liquid with some thixotropy. Liquid According to product specification Characteristic Not determined.	
pH-value (~):	Not determined.	
Change in condition Melting point/Melting range: Boiling point/Boiling range: Flash point:	Undetermined. 146.4 °C (295.5 °F) 42 °C (107.6 °F)	
Flammability (solid, gaseous):	Flammable	
Ignition temperature:	230 °C (446 °F)	
Decomposition temperature: Auto igniting: Auto-ignition temperature: Danger of explosion:	Not determined. Product is not self-igniting. 471°C In use, may form flammable/explosive vapor-air mixture.	
Explosion limits: Lower: Upper: VOC Content (max):	1.5 Vol % 10.8 Vol % Not determined.	
Vapor pressure at 20 °C (68 °F): Density: (~) Relative density at 20 °C (68 °F) Vapor density Evaporation rate	3.4 hPa (2.6 mm Hg) Not determined. 0.8 Not determined. Not determined.	
Solubility in / Miscibility with Water:	Not miscible or difficult to mix.	
Partition coefficient (n-octanol/water	r): Not determined.	
Viscosity at 25 °C (77 °F): Dynamic: Kinematic: Molecular weight	85 KR Not determined. Not determined. Not applicable.	
Other information	No further relevant information available.	

10 Stability and reactivity

Reactivity Stable under normal conditions.

Version Number 1.0

Printing date 06/07/2018

Trade name: Silcor Top Coat 70 - Part B

Chemical stability

Thermal decomposition: No decomposition if used according to specifications.

Possibility of hazardous reactions No dangerous reactions known.

Conditions to avoid No further relevant information available.

Incompatible materials: Strong oxidizers.

Hazardous decomposition products: Carbon monoxide and carbon dioxide

11 Toxicological information

Information on toxicological effects

Acute toxicity:			
LD/LC50	values rele	evant for classification:	
13463-67-'	7 Titaniun	n dioxide	
Oral	LD50	> 5000 mg/kg (rat)	
108-65-6 2	2-Propano	l, 1-methoxy-, acetate	
Oral	LD50	8532 mg/kg (rat)	
Dermal	LD50	8500 mg/kg (rat)	
Inhalation	LD50	>5000 mg/kg (rat) ((cutaneous))	
	LC50, 4h	35.7 mg/l (rat)	
	CL50, 4h	35700 mg/m ³ (rat)	
Primary in	rritant effe	ect:	
on the skir	n: May be	harmful in contact with skin.	
on the eye	: Causes ey	ye irritation and may cause conjunctivitis.	
inhalation	: Harmful	if inhaled.	
	Sensitization: May cause drowsiness or dizziness. Respiratory sensitization May cause respiratory irritation.		
Additional toxicological information: The product can cause inheritable damage.			
13463-67-7 Titanium dioxide			
Inhalation NOAEC 10 mg/m ³ (rat)

Persistence and degradability No further relevant information available.

Behavior in environmental systems:

Bioaccumulative potential No further relevant information available.

Mobility in soil No further relevant information available.

Additional ecological information:

General notes: Not known to be hazardous to water.

Results of PBT and vPvB assessment

PBT: Not applicable. **vPvB:** Not applicable.

Other adverse effects No further relevant information available.

13 Disposal considerations

Disposal methods:

Consult all regulations (federal, state, provincial, local) or a qualified waste disposal firm when characterizing product for disposal. Dispose of waste in accordance with all applicable regulations.

Recommendation:

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

Uncleaned packagings:

Recommendation: Dispose of contents/container in accordance with local/regional/national/international regulations.
