

GCP TRI-FLEX®

Synthetic Roofing
Underlayment

GCP Tri-Flex® mechanically-attached, synthetic roofing underlayment is designed to overcome the shortcomings of traditional roofing felt, while delivering advanced benefits that save the contractor time & labor.

"I Install GCP Tri-Flex® synthetic underlayment whenever I install Grace Ice & Water Shield®. I found that GCP Tri-Flex works better than any other synthetic roofing underlayment I've used. The fact that it is a wrinkle free, tear resistant product makes it easy to apply to the deck. I install roofs in the North Shore and South Shore areas of Boston and need materials that can withstand the inclement weather."

— TJ Livingstone, Land Line Construction Inc.

- Robust benefits compared to #30 Felt
- High performance water-shedding underlayment
- Backed by GCP - The name that roofing professionals trust

- **20 Times Stronger than Felt**
- GCP Tri-Flex® roofing underlayment can withstand high wind conditions, providing peace of mind against costly reworks.

Roll Coverage	10 square
Roll Weight	28 lbs
Exposure	180 days

Why GCP TRI-FLEX® Roofing Underlayment?

GCP TRI-FLEX®

More coverage per roll (5 times)

Increased efficiency
Labor Savings

Durable

Long exposure time allows temporary “dry in” of structures for up to 6 months
Flexible construction schedules

Lighter weight

Fast and easy installation
Saves time & labor costs

Slip Resistant Surface

Superior foot traction
Safer installation

#30 FELT

Less coverage

Requires more rolls to cover the same area

Less Durable—

Exposure degrades quality of felt

Double weight

Difficult to handle during installation

Less slip resistant

Can be slippery when wet
