DE NEEF®

Leak Sealing & Soil Stabilization

PREMIUM SOLUTIONS. EXPERT SUPPORT.

SAINT-GOBAIN

When Money Is Measured In Minutes

Underground construction is a deadline driven-business. Problems that impact your schedule need to be solved quickly and permanently.

Injection Technologies

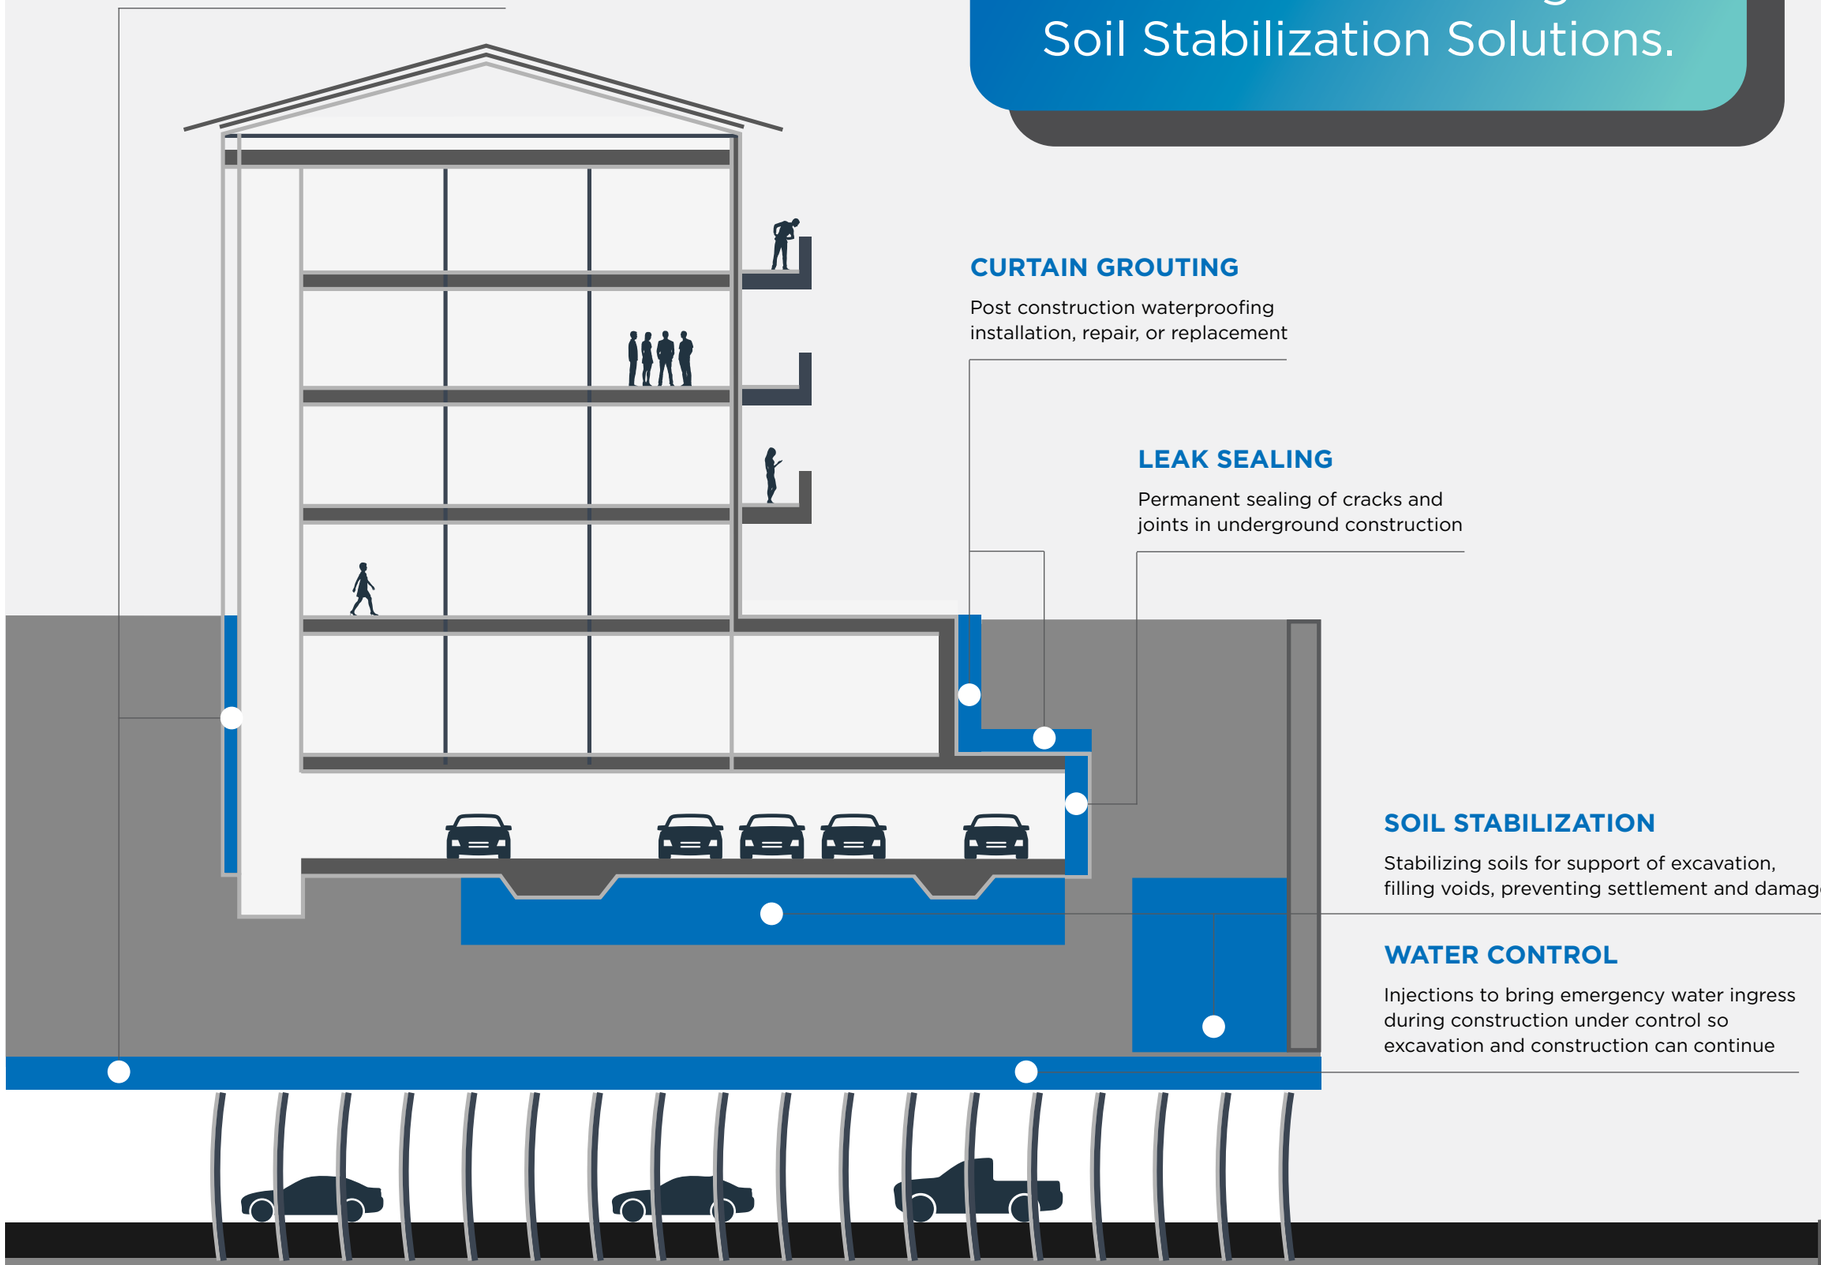

DE NEEF® injection materials are developed to bring the shortest possible injection cycles and give lasting solutions that reduces the risk of recurrence to the absolute minimum.

- High-quality raw materials prevent dilution and provide consistency
- Balanced viscosity and reaction profiles combine to bring the fastest leak sealing technology available
- Durable and environmentally friendly to last the lifetime of your structure

Proven Leak Sealing & Soil Stabilization Solutions.

WATER CUTOFF

Permanently stopping large leaks in underground structures and construction

CURTAIN GROUTING

Post construction waterproofing installation, repair, or replacement

LEAK SEALING

Permanent sealing of cracks and joints in underground construction

SOIL STABILIZATION

Stabilizing soils for support of excavation, filling voids, preventing settlement and damage

WATER CONTROL

Injections to bring emergency water ingress during construction under control so excavation and construction can continue

Solutions For All Your Leak Sealing And Soil Stabilization Project Needs.

Please refer to our selection guide below for the core DE NEEF® products that provide optimal injection solutions. This list is informative and general. For more information or help with selecting the right solution, please contact the DE NEEF sales manager responsible for your region or DE NEEF Technical Service.
