Halex Concrete Flooring Nails

Concrete flooring nails are made with high carbon steel and hardened for maximum hold in the hard concrete substrates. Concrete flooring nails have been designed and tailored to the installer’s specific needs for every type of flooring installation over concrete subfloors. All flooring nails are available in 50 lb bulk, 5 lb bags, and 1 lb bags.

General Purpose Concrete Flooring Nails

General purpose concrete flooring nails are used for most flooring installation applications. The 11/16 inch nail is the standard nail used as a pre-nail in carpet strip. Shorter lengths are used to install tap down style metal moldings when the nail heads will be covered by carpet. Longer lengths are used to install strip in special situations and are also used to temporarily hold carpet in position while seaming or stretching. All 12 gauge concrete flooring nails are also available with a rust resistant plated finish.

Heavy Duty Concrete Flooring Nails

Heavy duty concrete flooring nails are used with hard concrete when 12 gauge nails break or bend when driven. 5/8 inch nails and longer are also used to install carpet tack strips. Shorter concrete flooring nails are used to install metal molding when the nail heads will be covered by the carpet.

Extra Heavy Duty Concrete Flooring Nails

These extra heavy duty concrete flooring nails are used with very hard concrete that will not take a normal concrete flooring nail. They are slightly larger in diameter than a 1/8 inch drilled hole and are often used instead of aluminum drives or fluted concrete flooring nails. Nails over one inch long are used as stay nails. All extra heavy duty concrete flooring nails are plated for cleanliness and rust prevention.

**Extra Heavy Duty Fluted Concrete Flooring Nails**

These extra heavy duty concrete flooring nails are used with very hard concrete that will not take a normal concrete flooring nail. They are slightly larger in diameter than a 1/8 inch drilled hold and are often used instead of aluminum drives or fluted concrete flooring nails. Nails over one inch long are used as stay nails. All extra heavy duty concrete flooring nails are placed for cleanliness and rust prevention.
